SEPTEMBER 30, 2015

1. NATURE OF OPERATIONS AND GOING CONCERN

StrikePoint Gold Inc. (the “Company”) is incorporated under the laws of the Province of Alberta and is listed on the TSX Venture Exchange under the symbol “SKP”. The Company is considered to be in the exploration stage with respect to its mineral properties. Based on the information available to date, the Company has not yet determined whether its mineral properties contain ore reserves.

The Company’s head office and principle address is 507-837 West Hastings Street, Vancouver, BC, V6C 3N6. The registered and records office is located at 2080 – 777 Hornby Street, Vancouver, BC, V6Z 1S4.

These unaudited condensed consolidated interim financial statements have been prepared by management on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. Several material uncertainties may cast a significant doubt on the validity of this assumption. The Company continues to incur operating losses, has limited financial resources, no source of operating cash flow, and no assurances that sufficient funding, including adequate financing, will be available to conduct further exploration and development of its exploration projects. The Company’s ability to continue as a going concern is dependent upon its ability to obtain the financing necessary to complete its exploration project by issuance of share capital or through joint ventures, and/or to realize future profitable production or proceeds from the disposition of property. As at September 30, 2015, the Company has an accumulated deficit of \$22,956,914 (December 31, 2014 - \$22,033,935) and has working capital of \$407,527 (December 31, 2014 - \$351,147).

These unaudited condensed consolidated interim financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

2. STATEMENT OF COMPLIANCE AND NEW ACCOUNTING STANDARDS

These unaudited condensed consolidated interim financial statements were authorized for issue on November 30, 2015 by the directors of the Company.

Statement of Compliance with International Financial Reporting Standards

These unaudited condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standard 34 “Interim Financial Reporting” (“IAS 34”) using accounting policies consistent with the International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and Interpretations of the IFRS Interpretations Committee.

These unaudited condensed consolidated interim financial statements do not include all of the information required of a full annual financial report and is intended to provide users with an update in relation to events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the end of the last annual reporting period. It is therefore recommended that this financial report be read in conjunction with the audited annual consolidated financial statements of the Company for the year ended December 31, 2014.

The Company is exposed in varying degrees to a variety of financial instrument related risks.

Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company has cash balances but no interest-bearing debt. The bank account is held with a major Canadian bank. As all of the Company's cash is held by one bank, there is a concentration of credit risk with the bank. This risk is managed by using a major bank that is a high credit quality financial institution as determined by rating agencies. The Company's secondary exposure to risk is on its receivables. This risk is minimal as receivables consist primarily of refundable government sales taxes.

Currency Risk

Currency risk is the risk that arises from the change in price of one currency against another. The Company operates in Canada and is therefore not exposed to foreign exchange risk arising from transactions denominated in a foreign currency.

Interest Rate Risk

Interest rate risk is the risk due to variability of interest rates. The Company is exposed to interest rate risk on its bank account. The income earned on the bank account is subject to the movements in interest rates. The Company has cash balances and no-interest bearing debt, therefore, interest rate risk is nominal.

Liquidity Risk

Liquidity risk arises through the excess of financial obligations over available financial assets due at any point in time. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements at any point in time. The Company achieves this by maintaining sufficient cash balances.

Funding risk is the risk that market conditions will impact the Company's ability to raise capital through equity markets under acceptable terms and conditions. Under current market conditions, both liquidity and funding risk have been assessed as high.

12. CAPITAL MANAGEMENT

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration and development of its exploration and evaluation interests, acquire additional exploration and evaluation interests and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. In the management of capital, the Company includes the components of shareholders' equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The annual and updated budgets are approved by the Board of Directors.

The Company currently is not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management.
